### My company has no BIMcollab Cloud

Then you can purchase single licenses linked to an email address here on the right. You don't need to have a BIMcollab cloud: you can start right away. If your company might purchase a BIMcollab cloud later: no problem. We will add all single user licenses to the company space for flexible license management.

### My company has BIMcollab Cloud

Then it's best to ask your administrator to add ZOOM Pro licenses to the space. Pricing is the same as here, but licenses are flexible assignable to multiple users or even via license pools in Connected and Enterprise plans.
